Preface ..... ix–x

List of referees xi

Present state of Lake Ladoga

Ecological problems of Lake Ladoga: causes and solutions
by V. Drabkova, V. Rumyantsev, L.V. Sergeeva & T.D. Slepukhina 1–7

The trophic state of Lake Ladoga as indicated by late summer phytoplankton
by A.-L. Holopainen, P. Huttunen, G.I. Letanskaya & E.V. Protopopova 9–16

Bacterioplankton response to eutrophication in Lake Ladoga
by L. Kapustina 17–22

Bottom sediments and biocoenoses of northern Ladoga and their changes under human impact
by T.D. Slepukhina, I.V. Belyakova, Y.A. Chichikalyuk, N.N. Davydova, G.T. Frumin, E.M. Kruglov, E.A. Kurashov, E.V. Rubleva, L.V. Sergeeva & D. Subetto 23–28

Meiofauna of the profundal zone of the northern part of Lake Ladoga as an indicator of pollution
by J. Särkkä 29–38

Littoral zone of Lake Ladoga: ecological state evaluation
by I.M. Raspopov, I.N. Andronikova, O.N. Dotsenko, E.A. Kurashov, G.I. Letanskaya, V.E. Panov, M.A. Rychkova, I.V. Telesh, O.A. Tchernykh & F.F. Vorontsov 39–47

Invertebrate communities associated with macrophytes in Lake Ladoga: effects of environmental factors
by E.A. Kurashov, I.V. Telesh, V.E. Panov, N.V. Usenko & M.A. Rychkova 49–55

Fishery of Lake Ladoga – past, present and future
by L.K. Kudersky, J. Jurvelius, M. Kaukoranta, P. Tuunainen & K. Mäkinen 57–64

Hydrodynamics of Lake Ladoga and other large water bodies

New morphometrical data of Lake Ladoga
by A.I. Sorokin, M.A. Naumenko & M.F. Veselova 65–67

Main features of the thermal regime of Lake Ladoga during the ice-free period
by M.A. Naumenko, S.G. Karetnikov & A.I. Tikhomirov 69–73

Numerical modelling of large-scale ciruclation in Lakes Onega and Ladoga
by D.V. Beletsky 75–80

Density structure of the fine surface water layer of large lakes and remote measurement of the temperature
by G.N. Panin & S.G. Karetnikov 81–84

Physical limnological processes under ice
by B.C. Kenney 85–90
Mixing in ice-covered lakes
by L. Bengtsson 91–97
The influence of seasonal and year-to-year variability of water discharge from the Lake Ladoga – Neva River system on the salinity regime of the Baltic Sea
by N.V. Myakisheva 99–102
The estimation of current state of Lake Ladoga using mathematical models
by A.V. Leonov, N.N. Filatov & V.S. Titov 103–108
Particle pathways of Niagara river water in Lake Ontario affecting bottom sediment contamination
by C.R. Murthy 109–116
Water currents and spreading of river load in Lake Pyhäselkä, Saimaa, Finland
by T. Huttula, J. Koponen, K. Lehtinen, A. Wahlgren & R. Niinioja 117–124

Water quality and pollution

Joint Russian–Finnish study of radioactive contamination in the NW part of Lake Ladoga
by Z.G. Gritchenko, L.M. Ivanova, Y.A. Panteleev, N.A. Tishkova, T.K. Ikäheimonen, E. Ilus & R. Saxen 125–128
Distribution and release of sedimentary phosphorus in Lake Ladoga
by N.V. Ignatieva 129–136
Ecologic and hygienic evaluation of Lake Ladoga as a source of drinking water
by L.V. Vorobieva, G.V. Selyuzhitskii & G.I. Chernova 137–141
Lake Ladoga: chemical pollution and biochemical self-purification
by G.T. Frumin, O.A. Chernykh, N.L. Krylenkova & V.A. Scherbak 143–147
A survey on toxicity of cyanobacterial blooms in Lake Ladoga and adjacent water bodies
by B.V. Gromov, A.A. Vepritsky, K.A. Mamkaeva & L.N. Voloshko 149–151
Mathematical model for the ecosystem response of Lake Ladoga to phophorus loading
by G.P. Astrakhantsev, N.B. Yegorova, V.V. Menshutkin, I.V. Pisulin & L.A. Rukhovets 153–157
The impact of effluents of Pitkäranta pulp mill on the water quality of Lake Ladoga: a model study
by K. Granberg 159–166
Protein indication method in monitoring of pulp mill effluent pollution in Lake Ladoga
by T.N. Nizharadze & A.M. Tomilin 167–171

Ecological studies of Lake Ladoga biota

Zooplankton characteristics in monitoring of Lake Ladoga
by I.N. Andronikova 173–179
Species composition of planktonic Rotifera, Cladocera and Copepoda in the littoral zone of Lake Ladoga
by I.V. Telesh 181–185
